SELECTED PROJECTS

Digital Investor Mobile App
User Research, White-labeled UX/UI Design, ADA WCAG 2.1 Compliance

Digital Investor is a white-labeled investing product that is branded and customized for client fund companies. A few of the extensive application capabilities include, but are not limited to, a comprehensive new account application process, completing transactions, viewing portfolio details and updating account profile settings.

University of Kansas   MS, Architectural Engineering, 2016

Syracuse University   Master of Architecture, 2013

Amrita School of Engineering   Bachelor's in Technology, 2010

RECENT EXPERIENCE

SS&C Technologies
User Experience Designer, March 2020 - Present

° Lead UX/UI Designer for a white-labeled mobile application for the legacy 'Digital Investor' product with ADA WCAG 2.1 Level compliance. The first client's branded mobile app was released, via Apple and Google play stores, for investors to download in June 2021.
° Product design included user research via surveys, extensive competitive analysis, production of low-fidelity and high-fidelity wireframes to analyze user experience and to design for more efficient solutions from the existing legacy desktop product.
° Worked with stakeholders and clients to incorporate their feedback into the design decisions, while also advocating for an overall great user experience.
° Collaborated with development team and subject matter experts to solve for technical limitations while ensuring design standards compliance.
